Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 7-16 are rejected under 35 U.S.C. 102(e) as being anticipated by May (6,481,336). May discloses a dimensionally stable piston 2, a sealing ring 9 formed of PTFE, a jacket 4.1,5.1, and a housing 1, wherein the sealing ring 9 is automatically inflated by hydraulic inflating medium through a recess 12 in the jacket 4.1,5.1, the sealing ring 9 includes an inflatable region frontally located at one side of the sealing ring 9, a hinged film sealing lip 9.2 is frontally provided on another side of the sealing ring 9 that faces axially away from the inflatable region, and the sealing ring 9 forms a convex bulb that inflates to seal the region between the piston 2 and the housing 1.

Allowable Subject Matter

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3745

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of seven patents.

Jensen et al. '963, Jensen et al. '266, Emig, Iida, Bowell, Geiling et al., and Focht are cited to show sealing rings.
